Resource Cleanup

Rituals

It's the end of the week. To get rid of extra charges, it's time to delete all resources we've used throughout the week.

Much like in a real working scenario, the company you're working for will ask why you left unused resources running, consuming computing power and money from the business.

Take 30 minutes to delete `absolutely everything` you've created in AWS Cloud (and Azure if you're using it).
